Total acres to be changed 4445

Description of area and comments

Lands are continuous to existing SRA and used for livestock grazing as are the currently in the SRA. The lands have watershed values that are continuous to existing SRA. The new line also provides a better line of convenience by following the existing levee that the SRA boundary to the north is on and Highway 168 continuing to the canal to the east. The current boundary leaves that levee and follows power lines that are not a good geographic feature to use. This current line also excludes SRA lands for no reason that is justifiable by the field evaluation key.

If appropriate: Local Fire Jurisdiction
